

950mL Rat Bottle

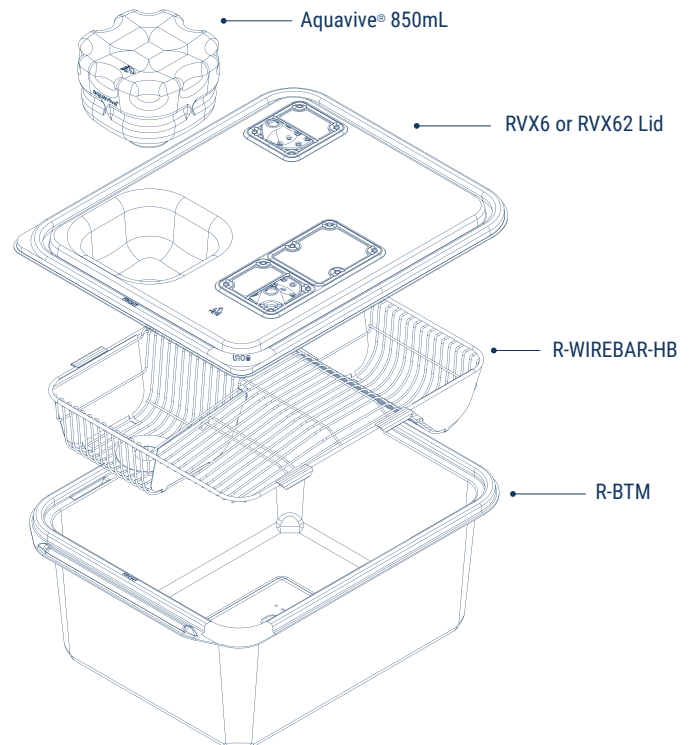

The 950 mL Rat Water Bottle will be phased out and replaced with our new standard 850mL Rat Water Bottle. Below are two options for seamlessly replacing the 950mL bottle with the 850mL in your vivarium.

Option 1

- Existing feeder R-FEED-U and cage bottom
- NEW water bottle protector R-WBP
- NEW Lid with a cavity for a water bottle (RVX6 or similar)
- NEW 850 ml water (empty or pre-filled) instead of 950 mL

Option 2

- Replace the existing feeder(R-FEED-U) AND the 950mL model (E-WBH-M) with 850mL compatible wirebar (R-Wire-HB)
- Change the bottles from 950 mL (R-WB-950) to 850 mL (R-WB-850)
- Change the lid to RVX6 or RVX62
